(54) Title: METHOD AND APPARATUS FOR AN IMPROVED LUER FITTING CONNECTION

(57) Abstract: A method and apparatus for an improved luer fitting connector is disclosed. The luer fitting connector includes a male or female luer fitting member and a locking member. The locking member may have at least one of a skeletal handle, a finlike handle, a cavity grip, and an undulating grip. The luer fitting connector also may include a male or female luer fitting member having a conical restraining surface and a locking member having a plateau shaped protrusion. A method of assembly of luer fitting connector members is also disclosed. The method may include providing a male or female luer fitting member having a conical restraining surface and providing a locking member having a plateau shaped protrusion. The method also may include mounting the locking member upon the male or female luer fitting member from the rear.
